

Luminous Slow Jigging Lures Slow Pitch Lures For Saltwater Metal Lead Fishing Lure

Our Product Introduction

for more products please visit us on fishing-set.com

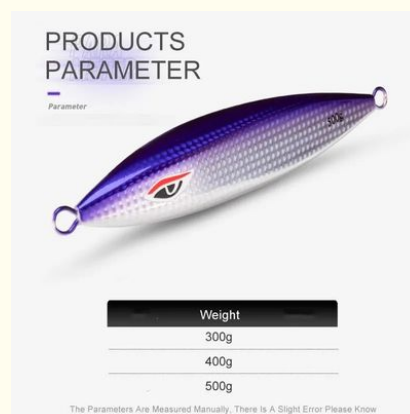

Basic Information

- Place of Origin: Shandong, China
- Brand Name: Sunrise
- Certification: ISO
- Model Number: 2221
- Minimum Order Quantity: 500 Pieces
- Price: 3.4 USD/Piece
- Packaging Details: Negotiated / Standard Package
- Delivery Time: Negotiated / 20 Working Days After Payment
- Payment Terms: T/T
- Supply Ability: 50000 Pieces/Month

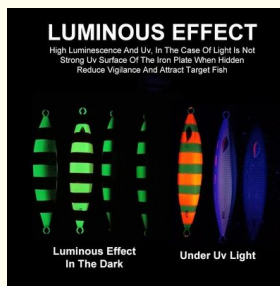

Product Specification

- Product Name: Fishing Lure
- Material: Metal
- Style: Jigging Lures
- Length: 155cm 165cm 183cm
- Weight (g): 300g 400g 500g
- Eyes: 3D Eyes
- Type: Artificial Hard Bait, Metal Jig
- Single Package Size: 10X8X5 Cm
- Highlight: Luminous Slow Jigging Lures, Slow Pitch Lures For Saltwater, Saltwater Slow Jigging Lures

Brand Name	OEM
Model Number	300g 400g 500g
Product name	Slow Jigging Fishing Lure
Type	Slow Sinking
Material	Lead Metal
Weight	300g 400g 500g
Color	5 Colors
Eyes	3D Lure Eyes
MOQ	500 Piece
Package	PVC Bag
Action	Slow Fall
Sample	Samples Availiable

Packaging & delivery

Selling Units:	Single item
Single package size:	10X5X2 cm
Single gross weight:	1.000 kg
Package Type:	PVC BAG

OCEAN FREAKS

Simulation Of Shape · Luminous / Uv Effect

Features of Saltwater Metal Lead Fishing Lures:

Material: These lures are primarily made from lead or lead alloys, which provide the lure with the necessary weight for casting and sinking to desired depths.

Shape and Design: Saltwater metal lead lures come in various shapes and designs, including bullet heads, knife-edge shapes, butterfly jigs, and more. The design influences the lure's action and how it behaves underwater.

Color and Finish: These lures can be found in a variety of colors and finishes, often designed to mimic baitfish, squid, or other prey species. Bright and reflective finishes may be used to attract fish by creating flashes of light.

Hooks: Saltwater metal lead lures are equipped with strong and sharp hooks to ensure secure hooksets and landing of fish. Treble hooks are common on many models.

Assist Hooks: Some metal lead lures have additional assist hooks attached to the lure's body or rear. Assist hooks can improve hooking rates, especially when fish strike from different angles.

Tips for Using Saltwater Metal Lead Fishing Lures:

Casting and Retrieving: Cast the metal lead lure into areas where you suspect fish to be and let it sink to your desired depth. Retrieve it with a combination of steady retrieves, erratic twitches, or pauses to mimic the behavior of prey fish.

Vertical Jigging: In deeper water, you can use a vertical jigging technique by dropping the lure to the desired depth and using an upward jerking motion of your fishing rod. This imitates the movement of injured or fleeing prey.

Vary Retrieval Speed: Experiment with different retrieval speeds to determine what triggers fish strikes. Some fish may prefer a fast retrieve, while others may respond better to a slower presentation.

Depth Control: Choose a metal lead lure of an appropriate weight to reach your desired fishing depth. Heavier lures sink faster and deeper, while lighter ones stay closer to the surface.

Match the Hatch: Select the color and size of the lure that closely resembles the baitfish or prey species commonly found in the area where you are fishing.

Maintain Hooks: Ensure that the hooks are sharp and in good condition. Dull hooks can result in missed opportunities and lost fish.
